Acme Commerce Customer Policies

Policy version: January 2026 | Applies to Acme direct-to-consumer purchases

Returns and refunds

Policy	Rule
Standard return window	30 calendar days from confirmed delivery
Condition	Product must be in resalable condition with accessories; reasonable inspection is allowed
Refund timing	Refund is normally initiated within 5 business days after inspection
Return shipping	Acme provides prepaid return shipping for defective or incorrect items
Final-sale items	Personalized products and clearance items marked final sale are not eligible for standard returns

Important distinction

The standard 30-day return period is separate from the product warranty. A customer outside the return window may still qualify for warranty service if the product has a covered defect and the warranty period has not expired.

Cross-reference: product-specific warranty periods are listed in the Product Catalog.

Warranty and Support

Product	Warranty period	Typical covered issue	Example non-covered issue
SmartWatch Pro	12 months	Hardware defect	Accidental physical damage
AirBuds X2	12 months	Charging or hardware defect	Lost earbud
HomeHub Mini	24 months	Hardware failure	Damage caused by liquid
PowerBank 20K	18 months	Battery or charging defect	Unauthorized modification
FitScale	12 months	Sensor or hardware defect	Damage from misuse

Support escalation

Tier 1 support handles setup, account, order-status, and basic troubleshooting questions. Tier 2 handles suspected hardware defects, repeated failures, and warranty assessment. Customers should provide the order number and a description of the issue. Photos or short videos may be requested for physical-damage assessments.

Battery complaints

For SmartWatch Pro and AirBuds X2, support should first verify charging behavior, firmware version, usage pattern, and whether the customer is using the supplied or compatible charging equipment before recommending replacement.

Shipping and Special Cases

Topic	Policy
Standard shipping	3 to 5 business days after dispatch
Express shipping	1 to 2 business days after dispatch where available
Dispatch timing	Orders are normally dispatched within 1 business day
Damaged delivery	Customer should contact support within 7 days and provide photos of the package and product
Wrong item	Acme arranges replacement and prepaid return shipping
Missing package	Support investigates with the carrier before replacement or refund

Decision examples

Example A: A SmartWatch Pro bought 8 months ago has a battery-related hardware defect. The customer is outside the 30-day return period but is still inside the 12-month warranty period. The case should be evaluated as a warranty claim rather than a standard return.

Example B: An AirPods X2 bought 20 days ago is unwanted but in resalable condition. It is inside the 30-day return window and may qualify for a standard return.

Example C: A HomeHub Mini bought 20 months ago develops a hardware failure. It is outside the 30-day return period but inside the 24-month warranty period, so warranty assessment is appropriate.

Cross-reference: Q1 Business Report shows that SmartWatch Pro and AirPods X2 generate substantial support volume, while HomeHub Mini has the lowest reported return rate.
