Acme Commerce Q1 2026 Business Report

Reporting period: January 1 to March 31, 2026 | Internal management summary

Executive summary

Acme Commerce generated \$1.18 million in Q1 net sales across five core products. AirPods X2 had the highest unit volume, while SmartWatch Pro generated the highest product revenue. HomeHub Mini recorded the lowest return rate. Customer support data shows that battery-related complaints were concentrated in SmartWatch Pro and AirPods X2.

Product performance

Product	Units sold	Net revenue	Return rate	Support tickets
SmartWatch Pro	2,180	\$652,820	4.8%	142
AirBuds X2	3,950	\$576,700	6.9%	231
HomeHub Mini	2,760	\$273,240	2.1%	96
PowerBank 20K	2,430	\$192,440	3.4%	71
FitScale	1,880	\$129,720	5.7%	88

Note: Revenue is shown as reported by the finance team. Small differences can occur between unit price × units and net revenue because of promotions, refunds, and regional pricing.

Cross-reference: the product names, list prices, specifications, and warranty periods are defined in the Acme Product Catalog.

Regional and Customer Analysis

Region	Revenue	Share of Q1 revenue	Top product	Observation
North America	\$542,600	46.0%	SmartWatch Pro	Premium products perform strongly
Europe	\$318,900	27.0%	AirBuds X2	High audio demand; return rate needs attention
Asia-Pacific	\$213,500	18.1%	HomeHub Mini	Strong entry-level smart-home adoption
Other	\$105,000	8.9%	PowerBank 20K	Travel accessories perform relatively well

Customer feedback themes

Theme	Affected products	Frequency	Management interpretation
Battery life	SmartWatch Pro, AirBuds X2	High	Improve setup guidance and investigate firmware optimization
Connectivity setup	HomeHub Mini	Medium	Simplify onboarding instructions
Charging speed	PowerBank 20K	Low	Clarify compatible charger requirements
Measurement consistency	FitScale	Medium	Improve app calibration guidance

Cross-reference: return eligibility, warranty periods, and support escalation rules are defined in the Customer Policies document.

Q1 Decisions and Recommendations

1. Promote SmartWatch Pro in North America

SmartWatch Pro produced the highest product revenue in Q1 and was the leading product in North America. Its 4.8% return rate is materially higher than HomeHub Mini's 2.1%, so marketing expansion should be paired with better product setup and support guidance.

2. Review AirPods X2 returns in Europe

AirPods X2 sold the most units but had the highest return rate at 6.9%. The support team should analyze battery-life complaints before increasing promotional volume.

3. Expand HomeHub Mini education in Asia-Pacific

HomeHub Mini is the leading product in Asia-Pacific and has the lowest return rate among the five products. Its 24-month warranty, documented in the Product Catalog, may also be a useful differentiator.

Key management questions

The business team should evaluate whether premium-product growth can be sustained without increasing support costs, whether AirPods X2 returns are related to battery expectations, and whether HomeHub Mini can become the main entry product for the smart-home category.

Cross-document demo prompts

Ask the chatbot: "Which product has the highest revenue and what is its warranty period?" "Which product should Acme promote in Asia-Pacific?" "What product has the highest return rate, and what support issue is associated with it?"
